

CASE STUDY:

M16 RIFLE STORAGE IN THE USA

Storing one of America's most popular military and police rifles – the Colt M16 assault rifle.

[1.0] PROJECT OVERVIEW

Dasco Storage Solutions has built thousands of M16 assault rifle storage solutions. Being one of the most used service weapons, it's found in armories across the USA. Dasco is also found in armories across the country because we've created the best storage system for M16s.

[2.0] AMERICAN M16 RIFLE STORAGE REQUIREMENTS

The standard-issue M16 assault rifle introduced in 1964:

- 7.5 pounds
- Fixed buttstock
- 20-inch rifle barrel

Common Colt M16 rifle accessories:

- Sight
- Bayonet
- Under-mounted grenade launcher

How Colt M16 rifles are stored varies from unit to unit. Smaller units, like police tactical teams may only require small, restricted racks for their M16 rifles. Large military units require lots of armoury storage for their M16 assault rifles. Dasco has storage solutions for either situation.

[3.0] DASCO'S STORAGE SOLUTIONS

Dasco has designed many storage products and components specifically for the Colt M16 assault rifle.

Restricted-Access American M16 Storage

If you need to store and secure weapons so they can only be accessed by personnel with a key, store your M16s in Bi-Fold Weapon Racks or Stackable Weapon Racks. Both storage solutions are available in multiple sizes to meet your storage requirements. Restricted-access racks are used to store M16 service weapons for police detachments and military armories across the United States.

Open-Access M16 Storage in the USA

Armories that can store M16 rifles in the open have a few different storage solutions available to them. Dasco's Expandable Weapon Rack is a great solution that expands to meet inventory needs. If you're storing 5 M16 rifles or 500, Expandable Weapon Racks can handle it. They are only limited by the size of your room.

The Mobile Weapon Cart is a great for transporting M16 rifles – either from armory to armory or from the armory to the range. The Mobile Weapon Cart can hold up to 20 M16 assault rifles. It's easy to maneuver through hallways and doors.

These solutions are commonly used by police detachments. These products have also been used to secure M16 training rifles at police colleges across America.

High-Density M16 Storage

Our special high-density weapon storage kits are designed to maximize M16 rifles storage in a smaller footprint. You can store 16 rifles in an area that typically fits 12. High-density storage is perfect for getting the most out of your space.

M16 Storage Products

Every storage product with our universal back panel can secure M16 rifles. Check them out and contact a storage specialist to build your storage system. For teams on the go, check out our Vehicle Storage Drawer.
