

CASE STUDY:

# COLT CANADA C8 CARBINE STORAGE

Storing one of Canada's most popular service weapons for military and police – the Colt Canada C8 Carbine.

## [1.0] PROJECT OVERVIEW

Dasco Storage Solutions has a solution for every C8 carbine storage project. Our products are found in Canadian police and military armouries across Canada. Even Colt Canada selected a Dasco Storage Solution for their armoury. If you have a C8 storage project on the go, we have your solution.

## [2.0] CANADIAN C8 RIFLE STORAGE REQUIREMENTS

The standard-issue C8 carbine introduced in 1994:

- 4 kilograms
- 76-84 cm (telescopic stock)
- 36 cm carbine barrel

Common Colt C8 carbine accessories:

- Sight
- Bayonet
- Under-mounted grenade launcher

Storage requirements for the Colt Canada C8 carbine vary from unit to unit. Small tactical police units that have fewer carbines only require small, restricted racks. Military units require lots of storage in their armouries for C8 carbines. Dasco has a storage solution for both situations.

## [3.0] DASCO'S STORAGE SOLUTIONS

We have many storage products and components designed specifically for the Colt Canada C8 carbine.

## Restricted-Access Colt Canada C8 Storage

If weapons need to be secured and accessed only by those with a key, we suggest storing C8s in our popular Bi-Fold Weapon Rack and Stackable Weapon Rack. Both options come in multiple sizes for varying storage requirements. We've used these solutions to store C8 service weapons for Royal Canadian Mounted Police detachments and Canadian Army armouries throughout Canada.

## Open-Access C8 Storage in Canada

Armourers that are allowed open access to weapons have a couple product options for storing C8 carbines. Our Expandable Weapon Rack is a great solution that expands to meet inventory needs. Whether you are storing 5 C8 guns or 500, these racks can handle it – the only limitation is the size of your room.

The Mobile Weapon Cart is a great solution for units that move their C8 guns around – either from armoury to armoury or from the armoury to the range. The cart can hold up to 20 C8 carbines and is very easy to maneuver.

These are commonly used by Royal Canadian Mounted Police detachments and municipal police stations. We've also used these racks to secure training C8 rifles at police colleges throughout Ontario.

## High-Density Colt Canada C8 Storage

Our special high-density kits are designed to maximize storing C8 carbines. They allow you to store 16 rifles in an area that typically fits 12. Perfect for getting the most out of your space.

## Colt Canada C8 Storage Products

Every product with our universal back panel can store C8 carbines. Check them out and contact a storage specialist to build your storage system. For teams on the go, check out our Vehicle Storage Drawer.
