

CASE STUDY:

M4 CARBINE STORAGE IN THE USA

Storing one of America's most popular service weapons for military and police – the Colt M4 Carbine.

[1.0] PROJECT OVERVIEW

Dasco Storage Solutions has a solution for every M4 carbine storage project. Our products are found in police, military and prison armories across America. We're honored to be the chosen storage solution for elite special forces units. Whether you're storing a fully accessorized M4 or standard service weapon, we have your solution.

[2.0] AMERICAN M4 CARBINE STORAGE REQUIREMENTS

The standard-issue M4 carbine introduced in 1994:

- 8.8 pounds
- 30-33 inches (telescopic stock)
- 14-inch carbine barrel

Common Colt M4A1 carbine accessories:

- Sight
- Bayonet
- Under-mounted grenade launcher

Storage requirements for the Colt M4 carbine vary from unit to unit. Small tactical police units that have fewer carbines only require small, restricted racks. Military units require lots of storage in their armories for M4 carbines. Dasco has a storage solution for both situations.

[3.0] DASCO'S STORAGE SOLUTIONS

We have many storage products and components designed specifically for the Colt M4A1 carbine.

Restricted-Access American M4 Storage

If weapons need to be secured and accessed only by those with a key, we suggest storing M4s in our popular Bi-Fold Weapon Rack and Stackable Weapon Rack. Both options come in multiple sizes for varying storage requirements. We've used these solutions to store M4 service weapons for police detachments and American military armories throughout the world.

Open-Access M4 Storage in the USA

Armories that are allowed open access to weapons have a couple product options for storing M4 carbines. Our expandable weapon rack is a great solution that expands to meet inventory needs. Whether you are storing 5 M4A1 guns or 500, these racks can handle it – the only limitation is the size of your room.

The Mobile Weapon Cart is a great solution for units that move their M4 guns around – either from armory to armory or from the armory to the range. The cart can hold up to 20 M4A1 carbines and is very easy to maneuver.

These are commonly used by police detachments. We've also used these racks to secure training M4 rifles at police colleges across America.

High-Density M4 Storage

Our special high-density kits are designed to maximize storing M4A1 carbines. They allow you to store 16 rifles in an area that typically fits 12. Perfect for getting the most out of your space.

M4 Storage Products

Every product with our universal back panel can store M4 carbines. Check them out and contact a storage specialist to build your storage system. For teams on the go, check out our Vehicle Storage Drawer.
